Final Project Proposal

Title: A Walk Down Pardall Tunnel
Artist: Kristy Wong

Description of the Work

For my final project, I would like to code a person walking down a tunnel towards a light and as he walks there's a tunnel of images of isla vista and campus along the side. It represents my four years at UCSB and serves as a reminiscent goodbye.

Code concepts to be utilized

I will create a 3D "world" with a sphere and create elements that will come down the tunnel.
Some elements include:
- Sunset pictures
- Memories
- Iconic symbols (beer die table, spikeball, blenders, surfboard, bikes)
- Campus hot spots (library, henley gate, pardall tunnel)

Challenges

Timing of items coming down
Making items smaller as they reach end of tunnel

Sketch
A man walks down a tunnel with lights flickering as photo memories breeze past him.
Somewhat vaporwave aesthetic

Ideas for digital exhibition
1. Looping video from start to finish
